European Journal of Operational Research 149 (2003) 700–702
EUROPEAN JOURNAL OF OPERATIONAL RESEARCH
www.elsevier.com/locate/dsw

Contents Volume 149

1 A generalized dual phase-2 simplex algorithm
I. Maros
17 A comparison of two reference point methods in multiple objective mathematical programming
J. Buchanan and L. Gardiner
35 Sensitivity analysis of the optimal assignment
C.-J. Lin and U.-P. Wen
47 A competitive facility location problem on a tree network with stochastic weights
S. Shiode and Z. Drezner
53 Dominant, an algorithm for the *p*-center problem
C. Caruso, A. Colorni and L. Aloi
65 On identifying dominant cliques
L.F. Escudero and S. Muñoz
77 A genetic-based framework for solving (multi-criteria) weighted matching problems
A.L. Medaglia and S.-C. Fang
102 Operationalizing technology improvements in product development decision-making
S. Bhattacharya, V. Krishnan and V. Mahajan
131 Optimal lot sizing for products sold under free-repair warranty
C.-H. Wang and S.-H. Sheu
142 Directional decomposition heuristic for a linear machine-cell location problem
J. Yu and B.R. Sarker
185 A fuzzy echelon approach for inventory management in supply chains
I. Giannoccaro, P. Pontrandolfo and B. Scozzi
197 Optimal process control policies under a time-varying cost structure
K. Tang, L. Gong and D.-S. Chang
211 Competitive location, production, and market selection
H. Rhim, T.H. Ho and U.S. Karmarkar
229 Optimal replenishment for a periodic review inventory system with two supply modes
C. Chiang
245 Book Review
W.W. Cooper, L.M. Seiford, K. Tone and D. Bouyssou
247 Editorial: Sequencing and scheduling
P. Brucker and S. Knust
249 Insertion techniques for static and dynamic resource-constrained project scheduling
C. Artigues, P. Michelon and S. Reusser
268 A new efficient simulated annealing algorithm for the resource-constrained project scheduling problem and its multiple mode version
K. Bouleimen and H. Lecocq

doi:10.1016/S0377-2217(03)00290-X

249 Insertion techniques for static and dynamic resource-constrained project scheduling
C. Artigues, P. Michelon and S. Reusser
268 A new efficient simulated annealing algorithm for the resource-constrained project scheduling problem and its multiple mode version
K. Bouleimen and H. Lecocq

doi:10.1016/S0377-2217(03)00290-X

282 Resource-constrained project scheduling: A critical activity reordering heuristic
V. Valls, S. Quintanilla and F. Ballestín
302 Lower bounds for resource-constrained project scheduling problems
P. Brucker and S. Knust
314 On linear lower bounds for the resource constrained project scheduling problem
J. Carlier and E. Néron
325 Order-based neighborhoods for project scheduling with nonregular objective functions
K. Neumann, C. Schwindt and J. Zimmermann
344 On minimizing the weighted number of late jobs in unit execution time open-shops
P. Baptiste
355 Identical parallel machines vs. unit-time shops and preemptions vs. chains in scheduling complexity
V.G. Timkovsky
377 Scheduling multiprocessor tasks on parallel processors with limited availability
J. Błażewicz, P. DellOlmo, M. Drozdowski and P. Mączka
390 Heuristic algorithms for multiprocessor task scheduling in a two-stage hybrid flow-shop
C. Oğuz, M.F. Ercan, T.C.E. Cheng and Y.F. Fung
404 An iterative algorithm for scheduling UET tasks with due dates and release times
Y. Zinder
417 Assembly line balancing in a mixed-model sequencing environment with synchronous transfers
S. Karabatı and S. Sayın
430 Gantt charts: A centenary appreciation
J.M. Wilson
438 Evaluation of unidirectional lateral transshipments and substitutions in inventory systems
S. Axsäter
448 Multi-stage newsboy problem: A dynamic model
K. Kogan and S. Lou
459 Reliability of software with an operational profile
S. Özekici and R. Soyer
475 Software reliability and cost models: Perspectives, comparison, and practice
H. Pham
490 Upper bounds and algorithms for the maximum cardinality bin packing problem
M. Labbé, G. Laporte and S. Martello
499 An alternative framework to Lagrangian relaxation approach for job shop scheduling
H. Chen and P.B. Luh
513 Scheduling to minimize the sum of weighted flowtime and weighted tardiness of jobs in a flowshop with sequence-dependent setup times
C. Rajendran and H. Ziegler
523 Rescheduling of identical parallel machines under machine eligibility constraints
O. Alagöz and M. Azizoğlu
533 Complexity and approximability results for slicing floorplan designs
V.G. Deineko and G.J. Woeginger
540 Yield information and supplier responsiveness in remanufacturing operations
G. Ferrer
557 Evaluating jointly constrained order quantity complexities for incremental discounts
P.A. Rubin and W.C. Benton
571 Discount pricing decisions in distribution channels with price-sensitive demand
S. Viswanathan and Q. Wang

588 Polling systems with breakdowns and repairs
O. Nakdimon and U. Yechiali
614 Three-triplet *np* control charts
Z. Wu and H. Luo
625 A continuous-time Markov chain under the influence of a regulating point process and applications in stochastic models with catastrophes
A. Economou and D. Fakinos
641 Weak efficiency in vector optimization using a closure of algebraic type under cone-convexlikeness
M. Adán and V. Novo
654 Multiobjective fuzzy linear programming problems with fuzzy decision variables
C. Stanciulescu, Ph. Fortemps, M. Installé and V. Wertz
676 Semivalues as power indices
F. Carreras, J. Freixas and M.A. Puente
688 An interactive approach to improve estimates of value efficiency in data envelopment analysis
T. Joro, P. Korhonen and S. Zionts
700 Contents Volume 149
